

Science of the SuperDogs

The Science of SuperDogs is a fun and interactive show that gives audiences a chance to see the SuperDogs doing amazing things while learning more about the science that makes ALL dogs super.

Combining entertaining and athletic events selected from our extensive catalogue with original programming that is unique to this show, Science of SuperDogs explores communication between man and dog, training versus behavior, scent detection and so much more, including myths about dogs AND facts about dogs that are even stranger than myth!

Our professional host provides entertaining and educational commentary with the option of having a member of your own scientific team as host or co-host.

These shows are extremely scalable and can be tailored to fit your space. The large-scale version is ideal for a 100' x 50' performing surface, accommodating an audience between 200 and 1,000 in bleacher-style seating. But a small-scale program is also available for venues with more limited space and casual seating.

Show length can be anywhere from 20 to 40 minutes based upon the events selected, with our 15-minute Pat N' Chat following each show. Two to three shows can be presented per day with easy load in/out and this program can be managed in a completely turnkey fashion.
